

Healthcare Interoperability Workshop

With interoperability you take a step into the new future!

Interoperability is the key to a shared future in the healthcare industry. With interoperable software, you ensure a future-proof solution that is adapted to the legal requirements. To achieve interoperability, technical, structural, semantic, security and organisational requirements must be met.

The Workshop

Together with you, we determine the challenges you are currently facing. It doesn't matter whether you need a new app, platform or just an interface, our experts will analyse your current situation to determine the best follow-up steps necessary to achieve your business goals. In doing so, we use the latest interoperable standards.

The topics for consulting

MVP concept

Time/ Material/Risks estimation

Solution architecture

Project implementation stages

Business analysis, use cases

Telemedicine solutions

Target group analysis

DICOM, HL7/FHIR, OpenEHR -based solutions

Workshop contents

1. Actual condition-analysis

Together with you, we look at your current business model and determine your current situation.

2. Use Case Matching

By analysing your use cases, we determine your exact software requirements, and our experts work with you to create a concept for software that is perfectly adapted to you and your needs.

3. Platform, architecture, infrastructure and design consulting

With a complete concept, we give you a technological overview and advise you on the appropriate tools, design and technology stack and a matching architecture, whether cloud-based or local - we will find the best solution for you.

4. After the workshop is before the implementation

Based on the outcomes developed together, you have the opportunity to start the project very quickly. This workshop serves as preparation and clarifies many questions in advance.

Your benefits

- Access to the latest technologies and standards (FHIR, HL7, OpenEHR, DICOM)
- Full project support: from concept to architecture to implementation
- Competitive advantage through software perfectly adapted to you and your needs
- Hybrid team building

Why WaveAccess?

- Over 20 years of expertise in software development
- 1200+ implemented projects with renowned customers
- Strong team of developers, architects, UI/UX designers and subject matter experts
- Microsoft Solutions Partner

Let's get started!
