

Discovery & Consulting Workshop

In-depth Workshop for product development with WaveAccess

In the dynamic world of innovation, launching a startup or introducing a new product demands strategic finesse. Our go-to-market expertise ensures your offering stands out. With our workshops tailored to specific business challenges, expect results that truly resonate.

Central to our approach is supportive guidance. We act as mentors, coaches, and experts, leveraging our technical acumen to navigate complex challenges. Together, we'll craft a plan that not only aligns with your initial vision, but also paves the way for informed decision-making and effective team collaboration.

1. Discover

Idea validation; gathering of business and functional requirements

2. Design

Architecture in detail; services integration, technologies and frameworks

3. Strategize & Plan

Roadmap; costs estimation; feature prioritization and selection for the MVP

What we can do for you

Our workshops are flexible, adapting seamlessly to your unique challenges and goals.

Whether you're launching a startup or introducing a new product within your enterprise, we ensure your offering shines brightly.

Define the validity of your idea

Build a project plan

Define core functionality

Define a detailed budget (per week, per each specialist)

Project scope validation

Create materials for your pitch meeting

Define product goals and indicators of success

Reduce time to market

The Team of Experts

Each specialist in our team brings seasoned expertise to the table, expertly assessing their project segment. The overall project is not a mere estimation: the team will offer you a well-rounded and detailed breakdown. With this plan, outcomes become foreseeable.

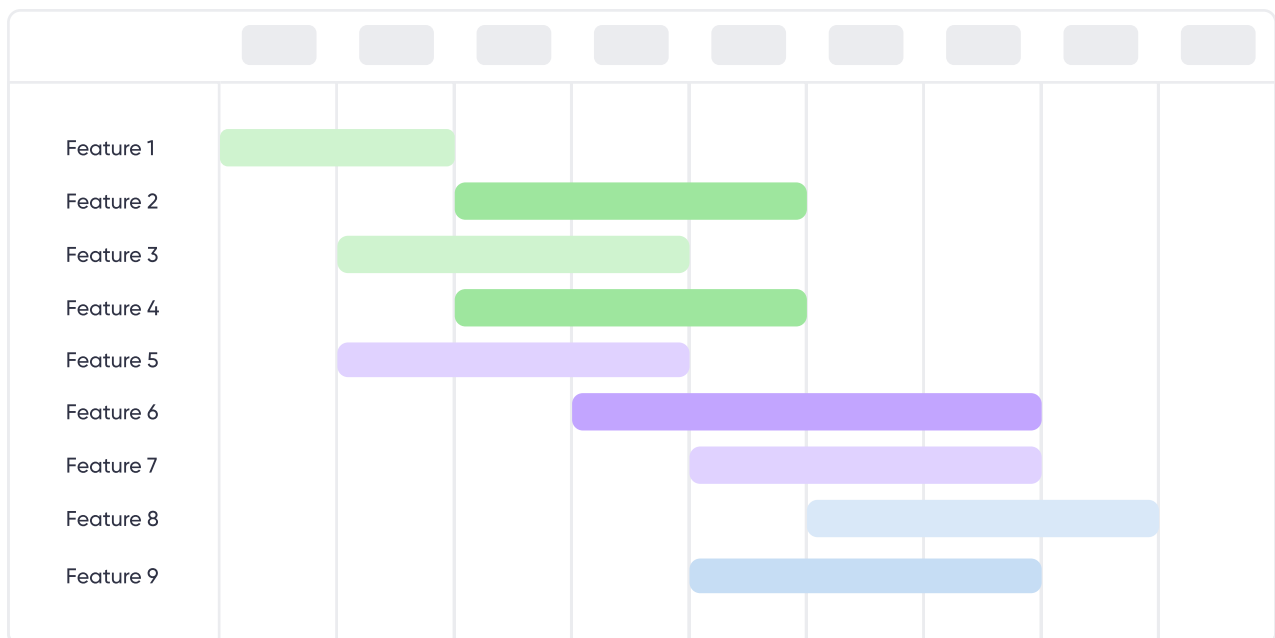

You will be guided by:

Project Manager	UX Specialist	Team Lead BE
Lead Analyst	Architect	Team Lead FE

Deliverables you receive within the workshop

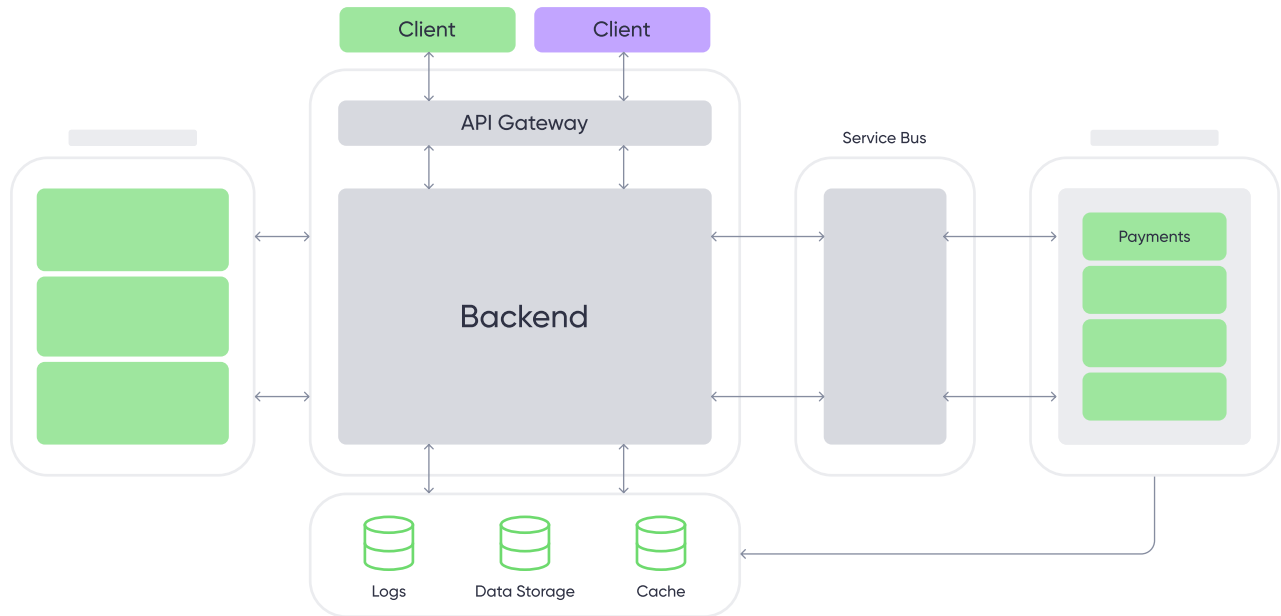

MVP roadmap

Enables you to monitor progress, validate the efforts of external developers, and ensure that every step aligns with the initial vision.

Architecture proposition

Schema, technologies, frameworks, cloud vs on premise, description of architecture.

High level estimation

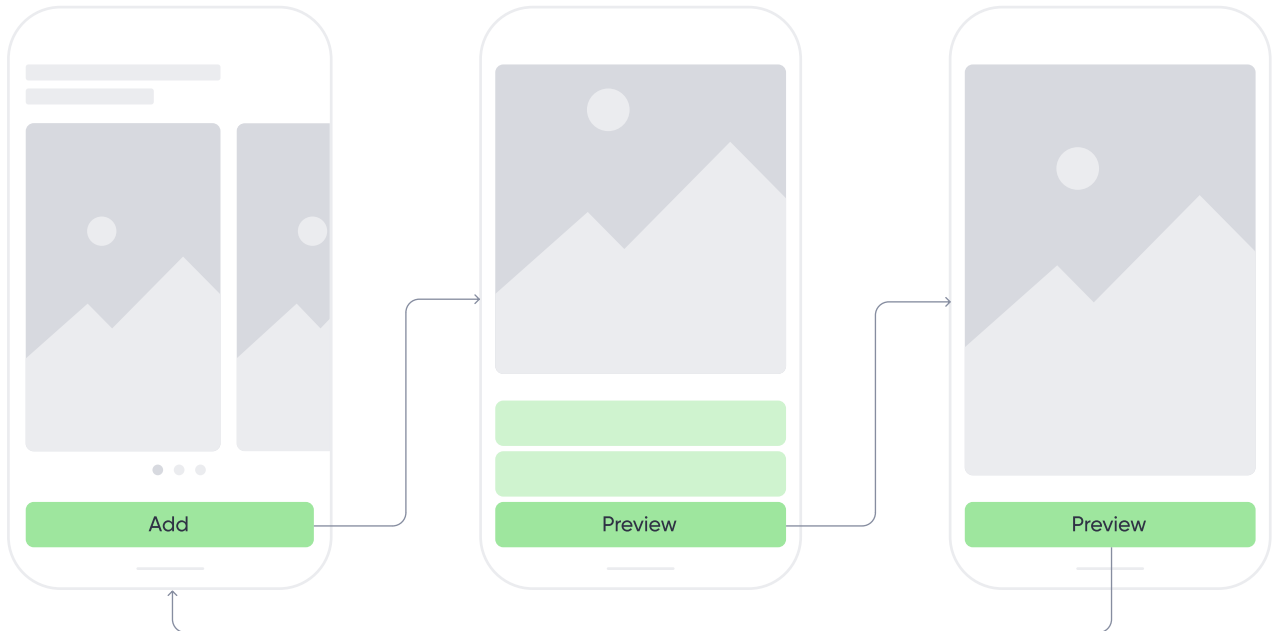

A feature-based Excel table. By multiplying estimated time by a certain rate, you see monthly project costs.

	Feature	Min(Hrs)	Max(Hrs)	Comments
●	[Green bar]	[Purple bar]	[Blue bar]	[Grey bar]
●	[Green bar]	[Purple bar]	[Blue bar]	[Grey bar]
●	[Green bar]	[Purple bar]	[Blue bar]	[Grey bar]
●	[Green bar]	[Purple bar]	[Blue bar]	[Grey bar]

Design	Fronted	Backend	Mobile	QA	Dev Ops
--------	---------	---------	--------	----	---------

UX Prototype

A clickable prototype in Figma showing some of the key functionality plus a set of wireframes.

And also

Customer segments description

Product value propositions

List of product goals

High level functionality requirements

Most critical use cases description

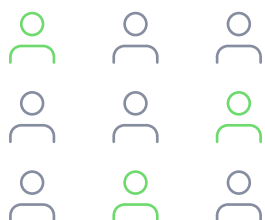

Use cases diagrams

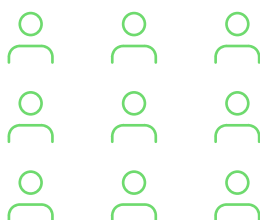

Delivery schedule is created individually for each client. All the materials will be approved with the Client and presented by a dedicated specialist in detail.

Collaboration models

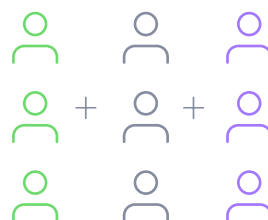

After our workshop discussions, customers are empowered with the knowledge and clarity to choose the most suitable approach for their needs. Our goal is to offer flexibility and align with our client's preferred working approach.

WA fills the gaps in customer team

WA provides full dedicated team

Working with several teams

If you lack a team, WA handles the entire project delivery process, allowing you to reach your goals with minimal effort and excel with our Managed Delivery model.

Choosing Managed Delivery ensures your critical needs are met

- Ensuring on-time product/service delivery
- Providing transparent cost analyses
- Mitigating risks through vendor expertise
- Engaging specialists with unique skills and experience
- Quickly adapting resources to evolving project requirements
